H&S WARRANTY

H&S Manufacturing Co., Inc. ("H&S") warrants this product to be free from defect in material and workmanship. Except as noted below, this warranty term is twelve (12) months on labor, and twenty-four (24) months on parts from the date of delivery of the product to the original purchaser by an authorized H&S dealer. Under this warranty, H&S will repair or replace, at its option, any covered part which is found to be defective in material or workmanship during the applicable warranty term. In no case will the covered repair cost of a part or parts exceed the replacement cost of that part. Warranty service must be performed by H&S or a dealer authorized by H&S to sell and/or service the product involved, which will use only new or remanufactured parts or components furnished by H&S. This warranty includes approved parts and labor to fix the product but does not include, and the purchaser is responsible for, any service call and/or transportation of the product to and from the dealer's place of business, for any premium charged for overtime labor requested by the purchaser, and for any service work not directly related to any defect covered under this warranty. This warranty includes only those components of the product manufactured by H&S. Warranty for any component not manufactured by H&S including, but not limited to, engines, batteries, tires, rims, hydraulic motors, pumps, etc. are covered by the warranty, if any, provided separately by their respective manufacturers.

This warranty in all its parts, is extended solely to the original purchaser of the product, is terminated upon any subsequent transfer or sale from or by the original purchaser and extends no third party benefits or rights whatsoever.

The warranty term for any product used in any commercial, custom, for hire or rental application, is limited to six (6) months from the date of delivery of the product to the original purchaser or the first day of service, whichever comes first, by an authorized H&S dealer.

For commercial, custom for hire, or rental application, warranty is limited to 6 months from the date of delivery to the original purchaser, or the first day in service, whichever is earlier.

This warranty does not include: (1) Any product that has been altered or modified in ways not approved by H&S; (2) Depreciation or damage caused by normal wear, use for which the product was not designed, misuse, improper or insufficient maintenance, improper operation, accident or failure to follow the product Operator's Manual recommendations and product decal recommendations; (3) Normal maintenance parts and service; (4) Repairs made with parts other than those available from H&S or performed by anyone other than H&S or a dealer authorized by H&S to sell and/or service the product involved.

To secure warranty service the purchaser must report the product defect to a dealer authorized by H&S to sell and/or service the product involved within the applicable warranty term together with evidence of the warranty start date and make the product available to that dealer within a reasonable period of time.

THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE OF THIS WARRANTY. H&S and the companies affiliated with it makes no warranties, representations, or promises, express or implied, as to the performance or freedom from defect of its products other than those set forth above and NO IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS OR FITNESS FOR A PARTICULAR PURPOSE IS MADE. IN NO EVENT WILL THE DEALER, H&S OR ANY COMPANY AFFILIATED WITH H&S BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. The ONLY REMEDY the purchaser has in connection with the breach of performance of any warranty on H&S products are those set forth above.

The selling dealer has no authority to make any representation or promise on behalf of H&S, or to modify the terms or limitations of this warranty in any way.

11/14/18

MANUFACTURER'S STATEMENT

Congratulations on your selection of an H&S Product. Your New H&S Product has been manufactured of the finest quality materials and components. The performance you receive from your machine is largely dependent upon how well you read, understand this manual, and apply this knowledge. There is a right and a wrong way to do everything. Please do not assume that you know how to operate and maintain your Machine before reading this manual carefully. Keep this manual available for ready reference. We are very appreciative of your patronage.

H&S reserves the right to make changes or add improvements to its products at any time without incurring any obligation to make such changes to products previously manufactured. Specifications, statements and descriptions of Products contained in this publication are subject to change without prior notification.

DEALER PRE-DELIVERY CHECKLIST

AFTER COMPLETION, DEALER SHOULD REMOVE AND RETAIN FOR RECORDS

After the *HI-DUMP* has been completely set up, check to be certain it is in correct operating order before delivering to the customer. The following is a list of points to inspect. Check off each item as you have made the proper adjustments and found the item operating satisfactorily.

I		HI-DUMP was not damaged in shipment. Check for dents and loose or missing parts. Report damage immediately to H&S Manufacturing Co., Inc.						
I		HI-DUMP has been correctly assembled according to the Dealer Set-up Instructions and/ or the Set-up & Assembly Instructions in this manual.						
Ī		Wheel nuts are torqued to listed specification and all other fastene tightly secured.	rs are					
I		All bolts and fasteners are tight.						
I		All shields and guards are in place and fastened.						
I		All grease fittings have been lubricated.						
I		Hoses and fittings are properly attached and there are no visible le	eaks.					
I		All cylinder/mechanisms are operating trouble free.						
I		Decals are in place and legible.						
I		For proper weight ballast, a tractor weight kit & weights, or solution 1,600 lbs has been added to the tire opposite the dump side.	n in excess of

DEALER DELIVERY CHECKLIST

AFTER COMPLETION, DEALER SHOULD REMOVE AND RETAIN FOR RECORDS

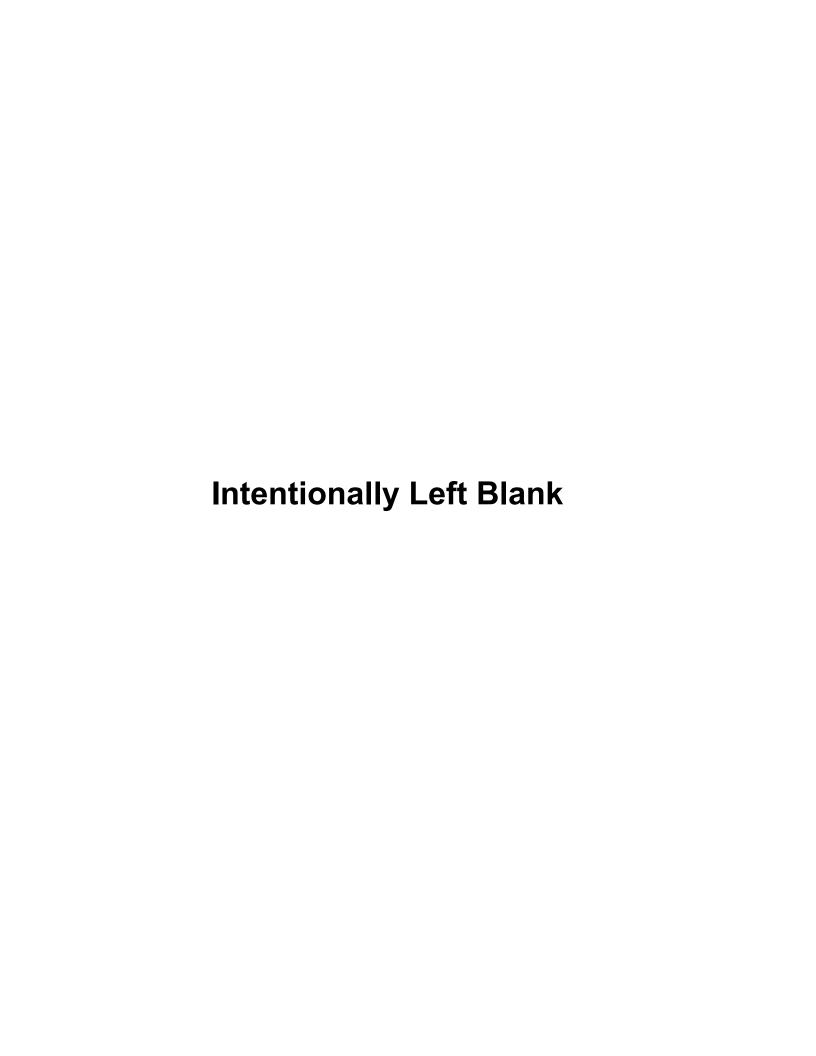

This checklist that follows is an important reminder of valuable information that should be passed on to the customer at the time this *HI-DUMP* is delivered.

Check off each item as you explain it to the customer.

This delivery checklist, when properly filled out and signed assures the customer that the Pre-delivery service was satisfactorily performed.

	Explain to the customer that the pre-delivery inspection was made.
	Explain to the customer all the safety precautions they must exercise when operating this unit.
	Explain the capacity constraints of GVWR rating of approximately 45,000 lbs for the <i>HI-DUMP</i> .
	Explain to customer that regular lubrication is required for proper operation and long life of the machine.
	Show customer the lubrication section of Owner's Manual.
	Give the customer Operator's Manual and make sure they read and understand all operating and service instructions.
	Have customer sign a completed "Warranty Registration," and mail it promptly.

Note: Warranty is not valid until warranty card is completed and returned to H&S Mfg. Co., Inc.

BE ALERT!

YOUR SAFETY IS INVOLVED.

THIS SYMBOL IS USED THROUGHOUT THIS BOOK WHENEVER YOUR PERSONAL SAFETY IS INVOLVED. TAKE TIME TO BE CAREFUL. REMEMBER: THE CAREFUL OPERATOR IS THE BEST OPERATOR. MOST ACCIDENTS ARE CAUSED BY HUMAN ERROR. CERTAIN PRECAUTIONS MUST BE OBSERVED TO PREVENT THE POSSIBILITY OF INJURY OR DAMAGE.

H&S MANUFACTURING CO. INC.

Keep signs in good condition. Immediately replace any missing or damaged signs.

RECOGNIZE SAFETY INFORMATION

This is the safety-alert symbol. When you see this symbol on your machine or in this manual, be alert to the potential for personal injury.

Follow recommended precautions and safe operating practices.

UNDERSTAND SIGNAL WORDS

A single word; DANGER, WARNING, or CAUTION is used with the safety-alert symbol. DANGER identifies the most serious hazards.

Safety signs with signal word DANGER or WARNING are typically near specific hazards.

General precautions are listed on CAUTION safety signs.

WARNING

CAUTION

FOLLOW SAFETY INSTRUCTIONS

Carefully read all safety messages in this manual, and all safety signs on your machine. Follow all recommended precautions and safe operating procedures.

OBSERVE MAXIMUM TRANSPORT SPEED

The maximum transport speed for this implement is 32 km/h (20 mph).

Some tractors are capable of operating at speeds that exceed the maximum transport speed of this implement. Regardless of the maximum speed capability of the tractor being used to tow this implement, do not exceed the implement's maximum transport speed.

Exceeding the implement's maximum transport speed can result in:

- * Loss of control of the tractor/implement combination
- * Reduced or no ability to stop during braking
- * Implement tire failure
- * Damage to the implement structure or its components

Use additional caution and reduce speed when towing under adverse surface conditions, when turning, and when on inclines.

Do not attempt transport if the fully loaded implement weighs more than 1.5 times the weight of the tractor.

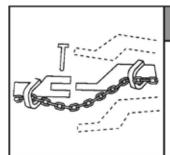

AWARNING

DO NOT GO NEAR LEAKS

- High pressure oil easily punctures skin causing serious injury, gangrene or death.
- If injured, seek emergency medical help.
- Immediate surgery is required to remove oil.

 Do not use finger or skin to check for leaks.
- Lower load or relieve hydraulic pressure before loosening fittings.

A CAUTION

TOWING HAZARD

To Avoid Injury or Machine Damage

- Install safety chain when attaching to tractor.
- Use a safety chain with tensile strength equal to or greater than the gross weight of the machine.
- Provide only enough stack for turning.

RUN-AWAY/BREAK-AWAY HAZARD

TO PREVENT SERIOUS INJURY OR DEATH:

SHIFT TO LOWER GEAR BEFORE GOING DOWN STEEP GRADES.

KEEP TOWING VEHICLE IN GEAR AT ALL TIMES. NEVER EXCEED A SAFE TRAVEL

SPEED.
ALWAYS USE SAFETY PIN WITH

ALWAYS USE SAFETY PIN WITH LOCKING DEVICE AND SAFETY CHAIN WHEN ATTACHING TOWING VEHICLE. 1495A

MAINTAIN SAFE CLEARANCE FROM ELECTRICAL POWER LINES AND AVOID CONTACT WITH ANY ELECTRICALLY CHARGED CONDUCTOR.

CONTACT WITH ELECTRIC
POWER SOURCES CAN RESULT
IN ELECTRICAL SHOCK OR
ELECTROCUTION.

FAILURE TO HEED THIS WARINING MAY RESULT IN SERIOUS INJURY OR DEATH.

1494P

A DANGER

OVERHEAD LIFT HAZARD MECHANICAL OR HYDRAULIC FAILURE

CAN ALLOW BOX TO FALL RAPIDLY.

- To Prevent Serious Injury or Death!
- Stand clear of machine when box is raising, dumping and/or lowering.
- Keep others away.

CRUSHING HAZARD

TO PREVENT SERIOUS INJURY OR DEATH:

KEEP HANDS AND BODY OUT OF HITCH AREA WHEN ATTACHING TOWING VEHICLE.

KEEP BODY CLEAR OF CRUSH POINT BETWEEN TOWING VEHICLE AND LOAD.

KEEP FEET AND LEGS CLEAR FROM UNDER TONGUE AREA IN CASE OF POSSIBLE JACK FAILURE.

▲WARNING

TO PREVENT SERIOUS INJURY OR DEATH:

READ AND UNDERSTAND OWNER'S MANUAL BEFORE USING. REVIEW SAFETY PRECAUTIONS ANNUALLY.

DO NOT EXCEED 10 MPH WHEN GROSS TOWED LOAD WEIGHS MORE THAN THE TOWING VEHICLE. IF GROSS TOWED LOAD WEIGHS LESS THAN THE TOWING VEHICLE, MAXIMUM TOWING SPEED IS 20 MPH.

DO NOT TOW WAGONS IN TANDEM ON PUBLIC ROADS.

DO NOT OPERATE ON PUBLIC ROADS UNLESS PROPER LIGHTS AND REFLECTORS ARE INSTALLED AND

DO NOT USE THIS RUNNING GEAR TO HAUL ANHYDROUS AMMONIA OR OTHER PRESSURIZED TANKS.

DO NOT ALLOW RIDERS ON MACHINE.

DO NOT OVERLOAD.

DO NOT EXCEED RATED CAPACITY OF WHEEL AND TIRE COMBINATION USED.

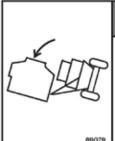

MAINTAIN WHEEL BOLTS AT TORQUE RECOMMENDED IN OPERATOR'S

BEFORE MAINTENANCE OR REPAIR STOP TOWING VEHICLE, SET PARKING BRAKE AND REMOVE IGNITION KEY.

PLACE SAFETY STANDS UNDER FRAME AND CHOCK WHEELS BEFORE WORKING ON TIRES OR RUNNING GEAR.

IF EQUIPPED WITH BRAKES, MAINTAIN PROPER ADJUSTMENT.

91604

WARNING

TIPPING HAZARD

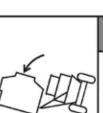

To Prevent Injury or Machine Damage. ADD FLUID TO TIRES ON THIS SIDE

AWARNING

HELP AVOID INJURY

- READ & UNDERSTAND THE OPERATORS MANUAL PROVIDED WITH THIS MACHINE. IF MISPLACED CALL H & S MANUFACTURING AT 715-387-3414 WITH MODEL AND SERIAL NUMBER.
- UNDERSTAND ALL SAFETY WARNINGS AND FUNCTION OF CONTROLS.
- KEEP SAFETY DEVICES IN PLACE AND WORKING.
- KEEP YOURSELF AND OTHERS WELL CLEAR OF MOVING PARTS.
- DISCONNECT ALL POWER BEFORE SERVICING OR CLEANING THIS MACHINE.
- DO NOT EXCEED 20 MPH

72203A

A WARNING

TIPPING HAZARD

- TO PREVENT INJURY OR MACHINE DAMAGE
- DO NOT DUMP WITH LOAD AT ONE END.
 DO NOT DUMP UNLESS WAGON IS ON LEVEL GROUND.
- DO NOT DUMP WITH A LOW OR FLAT TIRE.
- DO NOT MOVE WAGON WHEN BOX IS ELEVATED.
- DO NOT EXCEED LOAD CAPACITY
- FOR PROPER WAGON BALLAST ADD FLUID TO TIRE OPPOSITE THE DUMP SIDE

TO PREVENT SERIOUS INJURY OR DEATH

BEFORE YOU ATTEMPT TO OPERATE THIS EQUIPMENT, READ AND STUDY THE FOLLOWING INFORMATION. IN ADDITION, MAKE SURE THAT EVERY INDIVIDUAL WHO OPERATES OR WORKS WITH THIS EQUIPMENT, WHETHER FAMILY MEMBER OR EMPLOYEE, IS FAMILIAR WITH THESE SAFETY PRECAUTIONS. KNOW HOW TO STOP UNLOADING MECHANISM BEFORE STARTING IT.

If the machine needs repair, <u>disengage hydraulics</u>, <u>stop the engine</u>, <u>remove ignition key and allow all mechanisms to stop</u> before cleaning or working on the machine.

DO NOT ALLOW PERSONNEL OTHER THAN QUALIFIED OPERATOR NEAR THE MACHINE.

DO NOT attempt to perform maintenance or repair with tractor running and hydraulics hooked to the power source.

DO NOT step up on machine at any time.

DO NOT leave tractor cab when box is in operation.

DO NOT allow minors to operate or be near machine.

STAY CLEAR of rear of the HI-DUMP at all times.

DO NOT clean, adjust, or lubricate the machine when any part is in operation.

BE SURE the machine is clear of people, tools, and any other objects before engaging hydraulics.

NEVER operate the *HI-DUMP* until all guards and safety shields are secured in place.

STAY CLEAR of hydraulic lines, they may be under extreme pressure or heat.

CAUTION - Beware of low electrical wires.

Loose or floppy clothing should not be worn by the operator.

Securely support any machine elements that must be raised for assembly, repair, or adjustments. Use caution when working under or near these areas.

After assembling, repairing or adjusting, make sure all tools, parts, and rags are removed from the machine before attempting to operate it.

H&S Mfg. Co. always takes the operator and his safety into consideration and guards exposed moving parts for their protection. However, some areas cannot be guarded or shielded in order to assure proper operation. In addition, the Operators Manual and decals on the machine itself warn you of further danger and should be read and observed closely.

Study The Above Safety Rules
ATTENTION - BE ALERT - YOUR SAFETY IS INVOLVED

CAP SCREW TORQUE VALUES

The specifications below are the torque values for fasteners as it adheres to the SAE torque value standards. All fasteners should be torqued to the proper values found in the figures below unless otherwise specified by the engineering drawing.

Lubed torque would be any fastener that has grease, liquid Loctite, oil, etc. on the threads. Dry torque would be any fastener which has threads that are clean and dry and do not have any liquid Loctite or grease on them.

Hex Head Fasteners

The figure shown below shows how to determine what grade a fastener is.

HYDRAULIC FITTING TORQUE SPECIFICATIONS

Code 61 and 62 Flange Recommended Bolt Torques

Steps to Properly Assemble the Flange Port Clamping Bolts:

- Inspect components to ensure that male and female port threads and sealing surfaces are free of burrs, nicks and scratches, or any foreign material.
- 2. Lubricate the O-ring
- 3. Position flange and clamp halves
- 4. Place lock washers on bolts and insert through clamp halves
- Hand tighten bolts.
- Torque bolts in diagonal sequence in small increments to the appropriate torque level **refer to the table below.

SET-UP & ASSEMBLY

Note: Determine right and left side of the *HI-DUMP* by viewing it from the rear. If instructions or parts lists call for hardened bolts, refer to Cap Screw Torque Value page to identify.

- 1. If you are assembling the *HI-DUMP* Box refer to the appropriate assembly instructions.
- 2. Make sure that all bolts are tightened.
- 3. Check wheel bolts upon delivery, and periodically thereafter. Wheel bolts should be tightened to 340 ft./lbs. of torque. This torque is needed for the axle to carry its' rated capacity.
- 4. Check the tires for proper air pressure. Manufacturers recommended pressure rating on the tire is 35 PSI maximum.
- 5. Lubricate the *HI-DUMP* completely. (See <u>Lubrication Chapter</u> in this manual).
- 6. Check all taillights that they are functioning properly.
- 7. For proper weight ballast, a tractor weight kit & weights, or solution in excess of 1,600 lbs has been added to the tire opposite the dump side.

PREPARING FOR OPERATION

PREPARING THE HI-DUMP

- Properly lubricate the *HI-DUMP* before operating. Refer to the <u>Lubrication Chapter</u> of this manual for locations.
- Inspect the tractor hitch & wagon for fatigue, cracks, loose hardware, etc. before connecting the tongue of the wagon to the towing vehicle with a 2" diameter or larger hitch pin. Do not use an inadequate pin which may bend or break under severe conditions.
- Attach the H&S SC60000 safety chain. Provide only enough slack for turning.
- Clean all hydraulic couplings and connect them to the tractor or towing vehicle.
 - * Volume of oil required to operate *HI-DUMP*: 6.2 gallons
 - * Recommended pressure: 2250 PSI Min.
- Check wheel bolts upon delivery, and periodically thereafter. Wheel bolts should be tightened to 340 ft./lbs. of torque. This torque is needed for the axle to carry its' rated capacity.
- Check the tires for proper air pressure. Refer to the manufacturers recommended PSI rating on the tire.
- Do not operate the wagon near overhead power lines or other obstructions. Electrocution and or damage to the wagon may occur.
- Operate the box through the lift cycle several times powering it at the end each way to purge the system of air and rephase the system.
- Be sure to check the oil level in your tractor and add oil after cycling if needed.

TRANSPORTING

When transporting on the highway or roads;

- An SMV mount bracket is located on the rear of the HI-DUMP. Always use a slow moving vehicle
 emblem when transporting. Keep the SMV emblem and all reflectors clean and visible to warn other
 motorists.
- Always rotate the lights to the widest position and use the flashing highway lights when traveling on a road or highway, except where such use is prohibited by law.
- Obey all state and local laws concerning the use of the *HI-DUMP* on public roads.
- KNOW YOUR WEIGHT Do not pull a machine that does not have brakes at more than 1.5 times the weight of the towing vehicle.
- KNOW YOUR WEIGHT Do not pull a machine that has brakes at more than 4.5 times the weight of the towing vehicle.
- Always use an H&S SC60000 safety chain. Provide only enough slack in the chain to permit turning. Do not use the safety chain for towing without a pin. Inspect the chain for damage and replace if necessary.
- ASABE Standards state that while transporting, any equipment that does not have brakes, the maximum speed should NOT exceed 32 km/h (20 MPH).
- Always check for overhead obstacles during transport.

Overall height is 117"

Overall width is 158"

Overall length is 304"

Gross weight of the HI-DUMP 15,243 lbs.

OPERATION

UNLOADING/DUMPING THE WAGON

- 1. When dumping into a truck, or other receiving vehicle, choose a level area, free of obstructions.
- 2. With the operator in the tractor seat, and all others well clear of the *HI-DUMP*, actuate the "LIFT" hydraulic control valve to raise the box to the desired dumping height.
- 3. When the desired dumping height has been reached, actuate the "TILT/DUMP" hydraulic control valve to dump the box.
- 4. After the load is dumped, or the desired amount has been dumped, reverse the control valve to bring the box back to the upright position.
- 5. Reverse the control valve for the lift cylinders to return the box to the transport position.
- 6. The entire dumping cycle should take approximately two minutes depending on hydraulic supply output.
- 7. Keep tires properly inflated and recheck wheel nuts periodically for tightness

CAUTION:

- Never move the wagon when the box is raised. This will cause extreme stress on the structural members, and may cause failure.
- Never operate or dump the wagon with a low or flat tire. Always fill the tires on the non dumping side (the side opposite the receiving vehicle) with chloride solution or an alternative ballast.
 Failure to do so will cause instability when dumping the wagon and could cause the wagon to overturn.

REAR TOW BAR

Rear Tow Bar allows you to hook on and pull out a box when stuck.

NOTE: The Rear Tow Bar is NOT designed to hook implements or anything that can be towed to it.

STORAGE

STORAGE AT THE END OF THE YEAR

Rust prevention treatment of the **HI-DUMP** before placing the machine in storage will not only lengthen its useful life, but will assist in maintaining the best possible performance when the machine is put into service next year.

- Clean the entire wagon removing all the dirt and any excessive grease build up.
- Check the wagon over thoroughly for damaged or worn parts and loose or missing nuts and bolts.
- Replace or repair any part that would cause damage or excessive wear to other parts.
- Touch up any area where the paint has been worn or scratched off the machine.
- Check to see that all the safety decals are intact and readable. Replace any safety decal that is
 missing or has been scratched or damaged.
- Lubricate the HI-DUMP at all points shown in the Lubrication Section of this manual.
- Clean & repack the wheel bearings annually.
- Store the *HI-DUMP* inside if possible.

STARTING NEXT SEASON

- Take the time to read this Operators Manual to refresh yourself with the safety information and the operating instructions. This time spent could prevent any injury to yourself and also prevent damage to the machine.
- Clean off any dirt or grease that may have accumulated while the wagon was stored. This will prevent any abrasive action that could cause excessive wear.
- After hitching to the tractor, slowly operate the hydraulics to ensure they are working properly.
- Inspect all nuts and bolts for tightness. Make sure all moving parts move freely and do not bind.

OPTIONAL EQUIPMENT

TWP3032R - TIRE & WHEEL PACKAGE

27" x 32" 10 Bolt Wheels w/30.5 x 32 R1 16 Ply Tires

HDO18DLE - EXTENSION KIT

18" Dumping Lip Extension w/18" Front & Rear Flares

HDO2WB - WEIGHT BOX PACKAGE

Dual Weight Box Package include 2 weight boxes w/brackets.

HDBOWBW - WEIGHT BRACKET

(1) WEIGHT BRACKET FOR WEIGHTS W/HARDWARE

HDBO10W - WEIGHTS

(10) SUITE CASE WEIGHTS TO FIT HDBOWBW WEIGHT BRACKET

SC60000 - SAFETY CHAIN

60,000# Safety Chain

LUBRICATION GUIDE

Become familiar with all lubrication points and establish a systematic routine to insure complete and quick lubrication of the machine.

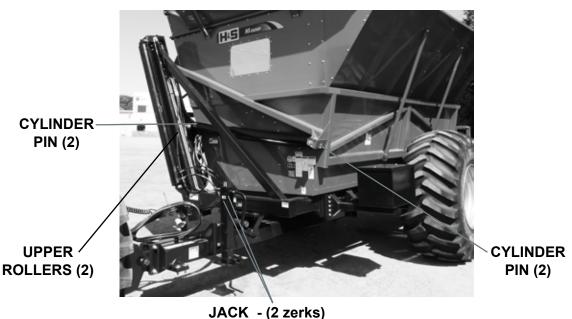

GENERAL INFORMATION

IMPORTANT: Catch and dispose of fluid per local waste disposal regulations whenever service is performed on hydraulic components, valves, cylinders, hoses, etc.

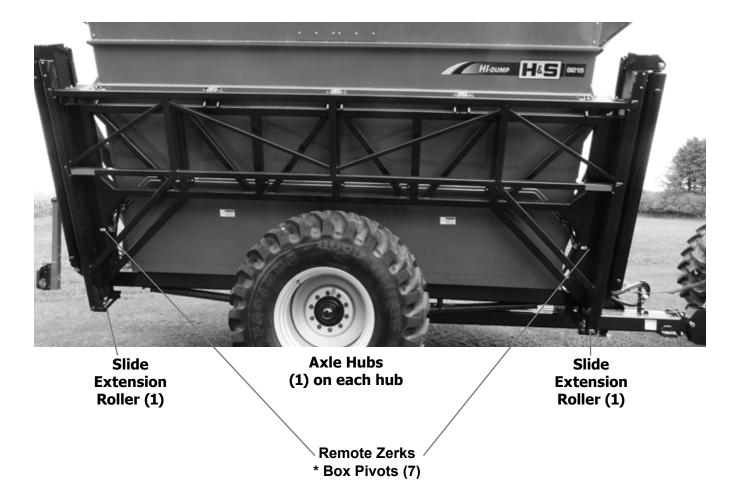

Grease Zerks

Grease as needed during normal use. Also grease **before**, **after storage**, **and after power washing**. Use a high quality grease.

Listed are the location and quantity of zerks.

LUBRICATION GUIDE

Wheel Bearings

The wheel hubs should be clean and repacked annually. This ensures that all contaminants are removed and provides a fresh supply of grease. The following procedure is necessary.

- 1. Remove the dust cap, cotter pin, slotted nut, and washer.
- 2. Remove the hub and clean the bearings and cavity. Replace and damaged or worn parts.
- 3. Pack the hubs with grease.
- 4. Install the seal in the hub.
- 5. Replace the hubs with inner bearings in place.
- 6. Place the outer bearing, washer, and slotted nut on the wheel spindle.
- 7. Adjust the bearings by tightening the slotted nut until there is a resistance to rotation. Loosen the slotted nut until the hub can be rotated freely by hand without end play.
- 8. Put the cotter pin through the spindle and slotted nut, and replace the dust cap.

Your H&S *HI-DUMP* was manufactured with operator safety in mind. Located on the HI-Dump are various decals to aid in operation, and warn of caution areas. Pay close attention to all decals.

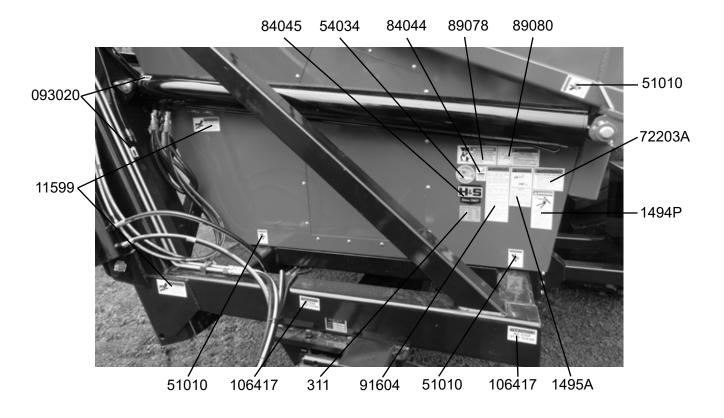

DO NOT REMOVE ANY OF THESE DECALS. IF DECALS ARE LOST, DAMAGED, OR IF THE TOP DOG IS REPAINTED, REPLACE DECALS.
REMEMBER: DECALS ARE FOR YOUR PROTECTION AND INFORMATION.

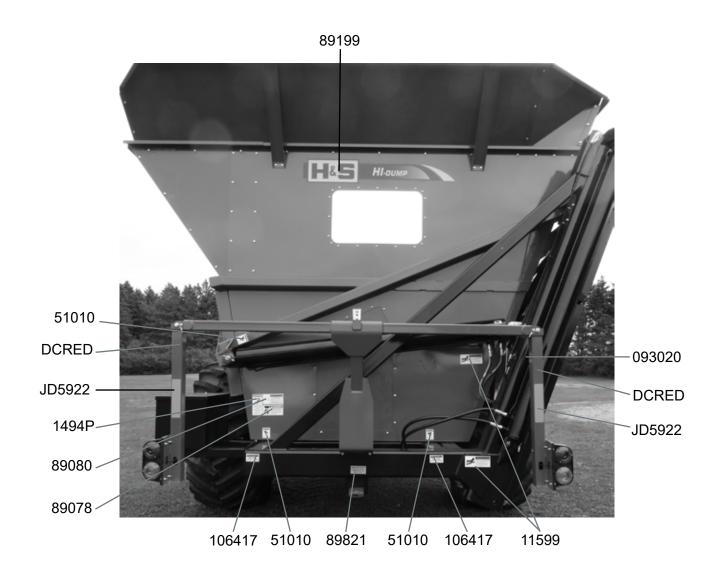

Listed below are the decals on your *HI-DUMP* Box.

c the decais of	ryour III-Down Box.
<u>Quantity</u>	<u>Description</u>
1	Patent Decal
2	Danger - Maintain Safe Clearance from Electrical Power Lines
1	Warning Runaway/Breakaway
4	Warning - Do not go near leaks
6	Pinch Point
1	Made In U.S.A.
1	Warning - Help Avoid Injury
2	Warning - Crushing Hazard
1	FEMA Decal
1	H&S Since 1967 Decal
2	Danger - Overhead Lift Hazard
	Warning - Tipping Hazard/Solution
6	Warning - Tipping Hazard/Machine Damage
1	Caution - Towing Hazard
2	HI-DUMP Decal - Front and Back
1	<i>HI-DUMP</i> Decal Right Side
1	HI-DUMP Decal Left Side
1	H&S Logo Decal Left Side
2	9215 Model # Decal
1	Important - Solution Plastic Tag
1	Important - Rear Tow
2	Important - Wheel Torque
1	Warning - To Prevent Serios Injury or Death
11	Grease Zerk Decal
4	Caution - No Step/Stay Clear
4	Amber 2 x 9 Reflective
2	Red 2 x 9 Reflective
2	Orange 2 x 9 Non-Reflective
	Quantity 1 2 1 4 6 1 1 2 1 1 2 6 1 1 2 1 1 1 2 1 1 4 4 4 4

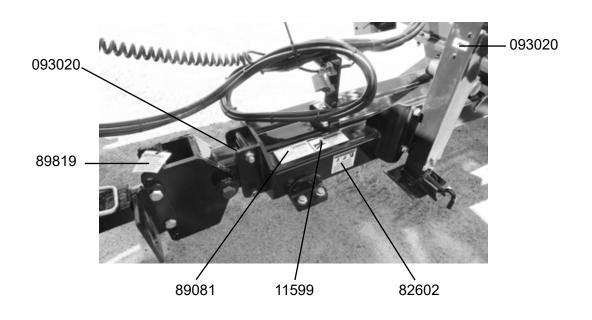

TROUBLE SHOOTING

WARNING;

MAKE SURE THAT THE TRACTOR IS SHUT OFF AND THE TRAILER CAN NOT MOVE BEFORE SERVICING THE HI-DUMP. MAINTENANCE AND REPAIR SERVICE WORK MUST BE PERFORMED BY A QUALIFIED SERVICE PERSON ONLY.

SYMPTOM

POSSIBLE CAUSE

POSSIBLE REMEDY

Box will not raise or lower	No hydraulic power	 Connect hydraulic circuits to tractor properly Actuate proper hydraulic valve Check quick-couplers to be certain they are completely engaged Replace clogged hydraulic filter in tractor Fill tractor hydraulic oil to proper level
	Lift/Dump cylinder leaking	Repair or replace cylinder as needed
	Box overloaded	Remove part of the load
	Insufficient hydraulic pressure	 Use power unit capable of providing 2250 psi. minimum pressure Replace worn hydraulic pump on tractor
	Hydraulic circuit crossed	Trace hydraulic circuit and connect so front and rear lift cylinders lift in series, & the dump cylinders are plumbed in parallel
Box will not dump properly	Box dumped on side hill	Dump box on level surface
Box chatters when raising or	Air in hydraulic system	Actuate lift/dump cylinders to fully extend and retract to purge the system of air
lowering, or will not raise to full height	Oil level low	Add hydraulic oil to the towing vehicles hydraulic system
	Insufficient reservoir capacity	Change power unit to provide a minimum reservoir capacity of 20.1 gallons
Box raises or lowers slowly	Not enough hydraulic oil volume	 Use a power unit capable of providing 34.1 GPM minimum Replace worn pump Replace clogged hydraulic filter in tractor Check for leaking fittings
	Lift/Dump cylinder is leaking internally	Repair or replace Lift/Dump cylinder as needed
	Box overloaded	Remove part of the load
