## Twin-Flex Merger

# 6128

# OPERATOR'S MANUAL

## WARNING

READ AND UNDERSTAND THIS MANUAL BEFORE OPERATING THIS EQUIPMENT. UNSAFE OPERATION OR MAINTENANCE OF THIS EQUIPMENT CAN RESULT IN SERIOUS INJURY OR DEATH.

Revision #01  
Starting Serial #021TF628001

HSMFG00420

Part #79760

## H&S MANUFACTURING CO.,INC.

MARSHFIELD, WISCONSIN 54449

(715) 387-3414 - FAX (715) 384-5463 - [hsmfgco.com](http://hsmfgco.com)

## H&S WARRANTY

H&S Manufacturing Co., Inc. ("H&S") warrants this product to be free from defect in material and workmanship. Except as noted below, this warranty term is twelve (12) months on labor, and twenty-four (24) months on parts from the date of delivery of the product to the original purchaser by an authorized H&S dealer. Under this warranty, H&S will repair or replace, at its option, any covered part which is found to be defective in material or workmanship during the applicable warranty term. In no case will the covered repair cost of a part or parts exceed the replacement cost of that part. Warranty service must be performed by H&S or a dealer authorized by H&S to sell and/or service the product involved, which will use only new or remanufactured parts or components furnished by H&S. This warranty includes approved parts and labor to fix the product but does not include, and the purchaser is responsible for, any service call and/or transportation of the product to and from the dealer's place of business, for any premium charged for overtime labor requested by the purchaser, and for any service work not directly related to any defect covered under this warranty. This warranty includes only those components of the product manufactured by H&S. Warranty for any component not manufactured by H&S including, but not limited to, engines, batteries, tires, rims, hydraulic motors, pumps, etc. are covered by the warranty, if any, provided separately by their respective manufacturers.

This warranty in all its parts, is extended solely to the original purchaser of the product, is terminated upon any subsequent transfer or sale from or by the original purchaser and extends no third party benefits or rights whatsoever.

The warranty term for any product used in any commercial, custom, for hire or rental application, is limited to six (6) months from the date of delivery of the product to the original purchaser or the first day of service, whichever comes first, by an authorized H&S dealer.

For commercial, custom for hire, or rental application, warranty is limited to 6 months from the date of delivery to the original purchaser, or the first day in service, whichever is earlier.

This warranty does not include: (1) Any product that has been altered or modified in ways not approved by H&S; (2) Depreciation or damage caused by normal wear, use for which the product was not designed, misuse, improper or insufficient maintenance, improper operation, accident or failure to follow the product Operator's Manual recommendations and product decal recommendations; (3) Normal maintenance parts and service; (4) Repairs made with parts other than those available from H&S or performed by anyone other than H&S or a dealer authorized by H&S to sell and/or service the product involved.

To secure warranty service the purchaser must report the product defect to a dealer authorized by H&S to sell and/or service the product involved within the applicable warranty term together with evidence of the warranty start date and make the product available to that dealer within a reasonable period of time.

**THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE OF THIS WARRANTY.** H&S and the companies affiliated with it makes no warranties, representations, or promises, express or implied, as to the performance or freedom from defect of its products other than those set forth above and **NO IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS OR FITNESS FOR A PARTICULAR PURPOSE IS MADE. IN NO EVENT WILL THE DEALER, H&S OR ANY COMPANY AFFILIATED WITH H&S BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.** The **ONLY REMEDY** the purchaser has in connection with the breach of performance of any warranty on H&S products are those set forth above.

The selling dealer has no authority to make any representation or promise on behalf of H&S, or to modify the terms or limitations of this warranty in any way.

11/14/18

## **MANUFACTURER'S STATEMENT**

Your New H&S Product has been manufactured of the finest quality materials and components. The performance you get from your machine is largely dependent upon how well you read and understand this manual and apply this knowledge. There is a right and a wrong way to do everything. Please do not assume that you know how to operate and maintain your Machine before reading this manual carefully. Keep this manual available for ready reference.

# DEALER PRE-DELIVERY CHECK LIST

## AFTER COMPLETION, DEALER SHOULD REMOVE AND RETAIN FOR RECORDS

After the Merger has been completely set-up, check to be certain it is in correct operating order before delivering to the customer. The following is a list of points to inspect. Check off each item as you have made the proper adjustments and found the item operating satisfactorily.

- Merger was not damaged in shipment. Check for dents and loose or missing parts. Report damage immediately to H&S Manufacturing Co., Inc.
- Merger has been correctly assembled according to instructions in this manual. Wheel nuts and all other fasteners are tightly secured.
- All bolts and fasteners are tight.
- All grease fittings have been lubricated. See LUBRICATION section of this manual for details.
- Hoses and fittings are properly attached and there are no visible leaks.
- All belts are at proper tension.
- PTO Shields turn freely.
- All shields and guards are in place and fastened.
- All mechanisms are operating trouble free.
- Tires are inflated to correct pressure.
- Decals are in place and legible.

# DEALER DELIVERY CHECK LIST

## AFTER COMPLETION, DEALER SHOULD REMOVE AND RETAIN FOR RECORDS

This check list that follows is an important reminder of valuable information that should be passed on to the customer at the time this Merger is delivered.

Check off each item as you explain it to the customer.

This delivery check list, when properly filled out and signed assures the customer that the Pre-delivery service was satisfactorily performed.

- Explain to the customer that the pre-delivery inspection was made.
- Explain to the customer all the safety precautions they must exercise when operating this unit.
- Explain to the customer the operation and adjustments of the Merger.
- Explain to customer that regular lubrication is required for proper operation and long life of the machine.
- Show the customer the LUBRICATION section of Operator's Manual.
- Give the customer Operator's Manual and make sure they read and understand all operating and service instructions.
- Have the customer sign a completed "Warranty Registration", and mail it.

Date Delivered \_\_\_\_\_

Dealer's Name \_\_\_\_\_

By \_\_\_\_\_

Signature of Original Buyer \_\_\_\_\_

Note: Warranty is not valid until warranty card is completed and returned to H&S Mfg. Co., Inc.

## SAFETY INFORMATION

**BE  
ALERT!**

**YOUR SAFETY  
IS INVOLVED.**

THIS SYMBOL IS USED THROUGHOUT THIS BOOK WHENEVER YOUR PERSONAL SAFETY IS INVOLVED. TAKE TIME TO BE CAREFUL. REMEMBER: THE CAREFUL OPERATOR IS THE BEST OPERATOR. MOST ACCIDENTS ARE CAUSED BY HUMAN ERROR. CERTAIN PRECAUTIONS MUST BE OBSERVED TO PREVENT THE POSSIBILITY OF INJURY OR DAMAGE.

**H&S MANUFACTURING CO., INC.**

# SAFETY INFORMATION

## RECOGNIZE SAFETY INFORMATION

This is the safety alert symbol. When you see this symbol on your machine or in this manual, be alert to the potential for personal injury.

Follow recommended precautions and safe operating practices.

## UNDERSTAND SIGNAL WORDS

A signal word - DANGER, WARNING, or CAUTION - is used with the safety alert symbol. DANGER identifies the most serious hazards.

Safety signs with signal word DANGER or WARNING are typically near specific hazards.

General precautions are listed on CAUTION safety signs.

**WARNING**

**CAUTION**

## FOLLOW SAFETY INSTRUCTIONS

Carefully read all safety messages in this manual, and all safety signs on your machine. Follow all recommended precautions and safe operating procedures.

Keep signs in good condition. Immediately replace any missing or damaged signs.

## OBSERVE MAXIMUM TRANSPORT SPEED

**The maximum transport speed for this implement is 32 km/h (20 m.p.h.).**

Some tractors are capable of operating at speeds that exceed the maximum transport speed of this implement. Regardless of the maximum speed capability of the tractor being used to tow this implement, do not exceed the implement's maximum transport speed.

Exceeding the implements maximum transport speed can result in:

- \* Loss of control of the tractor/implement combination
- \* Reduced or no ability to stop during braking
- \* Implement tire failure
- \* Damage to the implement structure or its components

Use additional caution and reduce speed when towing under adverse surface conditions, when turning, and when on inclines.

Do not attempt transport if the fully loaded implement weighs more than 1.5 times the weight of the tractor.

# SAFETY INFORMATION

**⚠ WARNING**

**HELP AVOID INJURY**

- READ & UNDERSTAND THE OPERATORS MANUAL PROVIDED WITH THIS MACHINE. IF MISPLACED CALL H & S MANUFACTURING AT 715-387-3414 WITH MODEL AND SERIAL NUMBER.
- UNDERSTAND ALL SAFETY WARNINGS AND FUNCTION OF CONTROLS.
- KEEP SAFETY DEVICES IN PLACE AND WORKING.
- KEEP YOURSELF AND OTHERS WELL CLEAR OF MOVING PARTS.
- DISCONNECT ALL POWER BEFORE SERVICING OR CLEANING THIS MACHINE.
- DO NOT EXCEED 20 MPH

72203A

**⚠ WARNING**

**DO NOT GO NEAR LEAKS**

- High pressure oil easily punctures skin causing serious injury, gangrene or death.
- If injured, seek emergency medical help. Immediate surgery is required to remove oil.
- Do not use finger or skin to check for leaks.
- Lower load or relieve hydraulic pressure before loosening fittings.

11599

**⚠ DANGER**

**NEVER ALLOW RIDERS ON THIS MACHINE**

82907L

**⚠ WARNING**

**STAY CLEAR**

CONTACT WITH TINES MAY CAUSE SERIOUS INJURY. DISENGAGE ALL POWER AND SHUT OFF TRACTOR BEFORE CLEANING OR SERVICING MERGER.

DC32211A

**⚠ DANGER**

**STAY CLEAR OF MOVING PARTS**

FAILURE TO HEED THIS WARNING MAY RESULT IN PERSONAL INJURY OR DEATH

KEEP CLOTHING, YOURSELF AND OTHERS WELL CLEAR.

**⚠ DANGER**

**STAY CLEAR OF MOVING PARTS**

FAILURE TO HEED THIS WARNING MAY RESULT IN PERSONAL INJURY OR DEATH

KEEP CLOTHING, YOURSELF AND OTHERS WELL CLEAR.

73101

**⚠ DANGER**

**STAY CLEAR OF MERGER WHEN OPENING OR CLOSING.**

FAILURE TO HEED THIS WARNING MAY RESULT IN PERSONAL INJURY OR DEATH

KEEP CLOTHING, YOURSELF AND OTHERS WELL CLEAR.

31401

**⚠ DANGER**

MAINTAIN SAFE CLEARANCE FROM ELECTRICAL POWER LINES AND AVOID CONTACT WITH ANY ELECTRICALLY CHARGED CONDUCTOR.

CONTACT WITH ELECTRIC POWER SOURCES CAN RESULT IN ELECTRICAL SHOCK OR ELECTROCUTION.

FAILURE TO HEED THIS WARNING MAY RESULT IN SERIOUS INJURY OR DEATH.

1494P

# SAFETY INFORMATION

**! DANGER**

**ROTATING DRIVELINE CONTACT CAN CAUSE DEATH  
KEEP AWAY!**

**DO NOT OPERATE WITHOUT-**

- ALL DRIVELINE, TRACTOR AND EQUIPMENT SHIELDS IN PLACE.
- DRIVELINES SECURELY ATTACHED AT BOTH ENDS.
- DRIVELINE SHIELDS THAT TURN FREELY ON DRIVELINE.

1494L

DC32211B

**! WARNING**

SLAG GENERATED BY HEATING OR CUTTING NEAR PRESSURIZED FLUID LINES CAN PUNCTURE LINES RESULTING IN SEVERE INJURY. NEVER WELD OR CUT ON HYDRAULIC RESERVOIR OR FRAMEWORK USED AS A RESERVOIR.

**! DANGER**

**STAY CLEAR OF EXTENSION WHEN RAISING OR LOWERING**

12502A

**! WARNING**

**CRUSHING HAZARD**

**TO PREVENT SERIOUS INJURY OR DEATH:**

**KEEP HANDS AND BODY OUT OF HITCH AREA WHEN ATTACHING TOWING VEHICLE.**

**KEEP BODY CLEAR OF CRUSH POINT BETWEEN TOWING VEHICLE AND LOAD.**

**KEEP FEET AND LEGS CLEAR FROM UNDER TONGUE AREA IN CASE OF POSSIBLE JACK FAILURE.**

82602

**! DANGER**

5896B

**ROTATING DRIVELINE CONTACT CAN CAUSE DEATH**

**! WARNING**

**STAY CLEAR**

1906C

**! WARNING**

HYDRAULIC SYSTEM ON MERGER CONTAINS STORED ENERGY. RELEASING PRESSURE FROM THE ACCUMULATOR BY ANY MEANS (WELDING, TORCH, LOOSE FITTINGS) MAY RESULT IN THE RAPID RELEASE OF OIL AND/OR GAS CAUSING PERSONAL INJURY OR DEATH.

DC32311B

# SAFETY INFORMATION

## TRACTOR:

This operators manual uses the term “Tractor” when identifying the the power source.

# WARNING

## TO PREVENT SERIOUS INJURY OR DEATH

BEFORE YOU ATTEMPT TO OPERATE THIS EQUIPMENT, READ AND STUDY THE FOLLOWING INFORMATION. IN ADDITION, MAKE SURE THAT EVERY INDIVIDUAL WHO OPERATES OR WORKS WITH THIS EQUIPMENT, WHETHER FAMILY MEMBER OR EMPLOYEE, IS FAMILIAR WITH THESE SAFETY PRECAUTIONS.

**DO NOT ALLOW PERSONNEL OTHER THAN THE QUALIFIED OPERATOR NEAR THE MACHINE.**

KNOW HOW TO STOP MACHINE BEFORE STARTING IT.

**BEFORE** starting tractor, be sure PTO shields turn freely and PTO is securely locked to tractor.

Stop the tractor engine, remove ignition key and allow all mechanisms to stop before cleaning or working on the machine.

If the machine becomes clogged or requires servicing, disengage the tractor PTO or tractor hydraulics.

**DO NOT** attempt to perform maintenance or repair with tractor running and PTO or tractor hydraulics hooked up.

**DO NOT** step up on machine at any time.

**NEVER** manually feed material into the pickup.

**DO NOT** allow minors to operate or be near the machine.

**DO NOT** clean, adjust, or lubricate the machine when any part is in operation.

**STAY CLEAR** of machine when rasing and lowering machine and during folding and unfolding machine.

**KEEP** hands, feet, and clothing away from pickup conveyor belts WHEN THEY ARE IN MOTION.

**LOOSE** and floppy clothing should not be worn by the operator.

**BE SURE** the machine is clear of people tools, and other objects before engaging PTO or tractor hydraulics.

**STAY CLEAR** of hydraulic lines and fittings. They may be under extreme pressure or heat.

**NEVER** start the Merger until all guards and safety shields are in place.

**CAUTION** - Beware of low electrical wires.

H&S Manufacturing Co. always takes the operator and their safety into consideration and guards exposed moving parts for their protection. However, some areas cannot be guarded or shielded in order to assure proper operation. In addition, the operators manual and decals on the machine itself warn you of further danger and should be read and observed closely.

**Study The Above Safety Rules**

**ATTENTION - BE ALERT - YOUR SAFETY IS INVOLVED**

# CAP SCREW TORQUE VALUES

The specifications below are the torque values for fasteners as it adheres to the SAE torque value standards. All fasteners should be torqued to the proper values found in the figures below unless otherwise specified by the engineering drawing.

Lubed torque would be any fastener that has grease, liquid Loctite, oil, etc. on the threads.

Dry torque would be any fastener which has threads that are clean and dry and do not have any liquid Loctite or grease on them.

## Hex Head Fasteners

The figure shown below shows how to determine what grade a fastener is.

	SUGGESTED ASSEMBLY TORQUE VALUES						WORKING TORQUE			
	SAE GRADE 2 -6"		SAE GRADE 5		SAE GRADE 8		18-8 SS	316 SS	BRASS	SILICON BRONZE
Diam & Thrds Per Inch	Dry FT. LB.	LUB FT. LB.	Dry FT. LB.	LUB FT. LB.	Dry FT.LB.	LUB FT. LB.	IN LBS	IN LBS	IN LBS	IN LBS
1/4-20	5.5	4.2	8	6.3	12	9	75.2	78.8	61.5	68.6
1/4-28	6.3	4.7	10	7.2	14	10	94.0	99.0	77.0	87.0

1-8	250	190	640	480	910	680	3440	3595	2815	3185
1-14	280	210	720	540	1020	760	3110	3250	2545	2885

## **SET-UP & ASSEMBLY**

**NOTE:** Determine right or left side of the Merger by viewing it from the rear. If instructions or parts lists call for hardened bolts, refer to bolt torque chart.

- Check the Merger for proper assembly and adjustment. Make sure that all bolts are tightened. Securely retighten after a few hours of operation as bolts can loosen up on new machinery.
- If the merger was shipped w/o the rims/tire assemblies attached, Attach the rims/tire assemblies, using the lug nuts furnished. Torque the mounting hardware to correct torque specification. Check the wheel bolts periodically thereafter.
- Check tires and inflate to the recommended pressure. (16.5 x 16.1 = 40 PSI or 15R19 x19.5 Radial Tires = 70 PSI)
- Lubricate the Merger completely (Refer to the Lubrication section in this Manual).

## SET-UP & ASSEMBLY

### IMPORTANT! HEAD SET-UP FROM SHIPPING

- \* Connect the tractor to the merger using the instructions from the Machine Prep & Operation Chapter in this Manual.
- Loosen the (4) head bolts (A) with 3/4" wrenches on both sides of the locking brackets - **total of (8) on each head**. **NOTE: Access to the head nuts is gained through the opening on the back of each head (C) as shown in the bottom picture.**
- Connect the hydraulics lines to the tractor.
- Using the tractor hydraulics, lower the heads to the ground.

- There is a 3/8" shim that is included in the wiring/control box. Insert the 3/8" shim from the **BOTTOM** of the locking bracket on the suspension linkage between the split - (B). **NOTE: The split will open after the heads have been lowered to the ground.**
- With the shim in place, tighten all (8) head bolts back up checking to make sure the 3/8" gap is maintained as the bolts are tightened.
- Remove the shim and repeat the process on the other head.

# **TRANSPORTING**

## **TOWING ON THE HIGHWAY**

Follow state and local regulations when towing farm equipment on public highways. Never tow the Windrow Merger on a public highway at a speed greater than 20 m.p.h. (32 kph).

## **LIGHTS & REFLECTORS**

Lights and reflective safety decals are on the Windrow Merger for safety.

# MACHINE PREP & OPERATION

## TRACTOR REQUIREMENTS

There are several requirements the tractor must have to ensure efficient operation of the Merger.

1. The tractor must be equipped with a 7-pin connector for proper transport and warning light function.
2. The tractor must be equipped with a 1000 RPM 1-3/8" 21 spline or 1-3/4" 20 spline PTO.
3. The tractor must be equipped with a category 2, 3N2 or 3 three point hitch (Quick Hitch would be most desirable).
4. The tractor must also be equipped with a 3-pin convenience outlet that is operated by tractor keyed power.
5. The Merger requires a minimum 95 H.P. tractor, **AND** that has a minimum tractor weight of 8,000 lbs.
6. Hydraulic Requirements
  - 2 - Remotes/SCV's
  - 12 g.p.m. per SCV
  - 2,750 p.s.i.

## MAIN TRACTOR PLUG

1. Black (Ground)
2. Red (Work Lights)
3. Yellow (Left Turn)
4. Not Used
5. Green (Right Turn)
6. Brown (Tail Lights)
7. Not Used

Tractor wiring may differ. Check your tractor manufacturers' electrical diagram to match to the Tri-Flex Merger's wiring.

## TRACTOR HOOK UP

### 3-Point

Connect the merger hitch to the tractor 3-point using the supplied hitch pins and adapter sleeves. Correct hitch distance from ground to center of pins is 24" to 26". If the tractor is equipped with a quick coupler make sure the latches are engaged.

# MACHINE PREP & OPERATION

## PTO

- The PTO is a direct drive system to the pump.
- Configure the proper PTO length and spline needed for the tractor. Using the two set screws supplied with PTO, connect the PTO shaft to the pump input shaft. The top PTO shield swings back with removal of driver side pin for easy access to PTO set screws. Replace the PTO shield before using the machine.
- Slide the spring loaded locking collar on the PTO yoke rearward and slide the yoke onto the tractor PTO shaft. Release spring loaded collar. Be sure the pins fall into the groove on the tractor PTO shaft and collar snaps forward into position. **CAUTION:** Do not use a steel hammer to aid in joining PTO parts.

**Recommended PTO operating speed is 700-750 RPM**

## Hydraulics

- Connect the two sets of remote hoses supplied with merger to tractor remote ports.
- Each set of hoses/remotes folds/unfolds the merger heads and open/closes the deflectors.

**NOTE: AFTER the heads have contacted the ground and the deflectors are open, continue to hold the SCV/Remote control for an additional 3 to 5 seconds. This ensures the head suspension system will work properly following the ground.**

# MACHINE PREP & OPERATION

## TRACTOR HOOK UP

### Electrical

1. Install the merger main power supply cable direct to the tractor 12V batteries. Route the power supply cable so it can easily be connected to the large black round plug located at the front of the merger. Attach the power supply cable securely, making sure it will not interfere with tractor functions.

2. Mount the control box in a convenient position in the cab for easy operator access. A bracket is included with the control box to aid this process.

Negative & Positive  
Battery Cables

3. Connect the 3-pin cable to the tractor convenience outlet. This connection is only used for a keyed power supply for main power relay.

4. Connect the (A) plug from the control box harness to the (A) plug on the merger.

5. Connect the (B) plug on the main wire harness from the battery.

## **OPERATOR DISPLAY**

**Top Toggle Switch** is a 3-position switch. Positioning the switch to the left allows both belts to merge left, Positioning the switch in the center allows you to split, left and right. Positioning the switch to the right allows both belts to merge right.

**MIDDLE - "PUSH BUTTON"**  
Shuts both belts off or turns both belts on.

**BOTTOM TOGGLE** is used for merging with only one head. Whichever head is in the transport position **MUST** have the cross conveyor belt shut off with this switch.

## MACHINE PREP & OPERATION

There is a Fuse Box located at the rear of the pole with fuses to protect the electrical system.  
Position #1 - 15 amp  
Position #2 - 15 amp  
Position #3 - 7.5 amp

# ADJUSTMENTS

## PICKUP SPEED

The pickup speed on the Merger can only be changed by varying the tractor PTO speed. For best results, adjust the pick-up speed with the tractor rpm to match the ground speed.

## CROSS CONVEYOR SPEED

The cross conveyor speed on the Merger can only be changed by varying the tractor PTO speed. The speed relationship between the pickup and the cross conveyor is preset for an all around optimum performance level.

## CROSS CONVEYOR BELT ADJUSTMENT

**NOTE: Cross Conveyor Belts should be checked for correct tracking frequently in the first 300 acres, then daily thereafter.**

To adjust belt tracking;

1. Loosen the 2 bolts (A) that allows the belt tracking adjustment slide to move.
2. Adjust the jam nuts either way to set the belt tracking (B)
3. Tighten the (2) bolts (A) after the belt tracking is set.

# ADJUSTMENTS

## HEADS

### Pressure Setting

The head weight pressure setting is factory set at 1600 psi. In certain field conditions, you may need to change the setting to increase or decrease the head weight.

Changing the setting;

- Move the Ball Valve Lever to the “OPEN POSITION” as shown in the bottom picture.
- Pull up on the “PRESSURE ADJUSTING LEVER” shown in the picture to INCREASE the pressure thus making the heads LIGHTER.
- Pushing down on the “PRESSURE ADJUSTING LEVER” shown in the picture DECREASES the pressure thus making the heads HEAVIER.
- After you have achieved the level of head pressure that you want, move the Ball Valve Lever to the “CLOSED POSITION” as shown in the top picture.

# SERVICE

## DAILY SERVICE

### Cleaning

It is a good practice to clean the entire merger at the end of each day. Getting the chaff and crop off the merger when dry will save the appearance and finish of the merger. It also gives the operator a opportunity to check the machine up close to keep it operating properly.

Before starting to merge the next day, it is good practice to engage the PTO and run the merger when it is in the transport position. This will loosen and discharge any material that has dried in the heads or cross conveyors overnight.

### Skid Shoes

Clean out the skid shoes at least once a day when the merger is in the transport position. They can become packed with debris and dirt during normal operation. Cleaning is very important for proper skid shoe operation.

### Pickups & Hay Strippers

Check the pickup teeth and hay strippers daily that none were broken or damaged by field obstructions to ensure proper field performance.

### Oil Fill & Check Plugs

Check the oil level daily by the “Cold Level Check Plug”. If oil cannot be seen at the Cold Level, remove the Fill Plug and add oil until oil starts to come out of the Cold Level hole. Re-install the Cold Level & Fill Plugs.

# SERVICE

## ANNUAL SERVICE

### Cam Bearings

Depending on the acres per year, and field conditions, the cam follower bearings should be replaced at the end of each season. They are a wear item. The outside diameter will become smaller and the bearing may fail. Replacing the bearings before failure will lengthen the life of the cam tracks.

### Tine Bar Bearing

Tine bar bearing should be inspected at the end of each season. They are a wear item. The two piece nylon insert was made easy to replace. Replacing these on an annual basis will insure longer tine bar life.

### Cross Conveyor Belts

The cross conveyor belts should all be removed at the end of each season and the inner frame work thoroughly cleaned of build-up and debris. This will ensure proper operation the next season.

# SERVICE

## ANNUAL SERVICE

### Oil Filter

The hydraulic oil filter should be changed at least once a year or prior if filter becomes clogged during the season.

If the filter pressure gauge reads 15 - 20 p.s.i., the filter is becoming clogged.

To change the filter;

1. Unscrew the filter cover.
2. Carefully remove & discard the used filter cartridge.
3. Insert the new oil filter cartridge.
4. Replace filter cover.

### Head Gearboxes

Each center cam gearbox uses 26 ounces of SAE 30W motor oil. The oil in the (2) head gearboxes should be changed on an annual basis.

## OPTIONS & SERVICE

### Remote Filter

There is a dealer installed Remote Filter option available to filter any particles that come from the tractor hydraulic system. The R.H. picture shows removal of one of the filters for cleaning. A allen style wrench is used for removing the plug.

# LUBRICATION

## GENERAL INFORMATION

**IMPORTANT:** *Catch and dispose of fluid per local waste disposal regulations whenever service is performed on hydraulic components (valves, cylinders, hoses, etc.) or transmission.*

There are numerous grease fittings on your merger. If these are lubricated properly and often enough, it will prolong the life of the merger. Grease daily during normal use and **before and after storage and after power washing.** Use a good grade of high quality grease. Make sure grease comes out around the shaft on the sleeve type bearings. On the sealed ball bearings, grease should be added slowly until a slight bead forms at the seals indicating the correct amount of lubricant. Wipe off excess grease to prevent accumulation of grit around the bearings.

For the center cam gearboxes, use SAE30W motor oil. The gearboxes hold 26 ounces of oil.

The tongue reservoir holds 32 gallons of ISO 46 hydraulic oil. The complete system hold 42 gallons

- A. (2) Zerks - One on each wheel hub.
- B. (3) Zerks - PTO - One on each u-joint and one on the slide tube.
- C. (6) Zerks - One on each end of each pickup head.
- D. (2) Zerks - One on each head pivot.
- (20) Zerks - Suspension System - 10 on each side.
- E. (4) Zerks - One on each side of the cam on each head

Idler  
Bearings,  
1 zerk on  
the front  
side of each  
roller.  
Grease  
**ANNUALLY**  
when belts are  
removed

## DECAL LOCATION

Your H&S Merger was manufactured with operator safety in mind. Located on the merger are various decals to aid in operation, and warn of danger or caution areas. Pay close attention to all the decals on your windrow merger.

**DO NOT REMOVE ANY OF THESE DECALS. IF DECALS ARE LOST, DAMAGED, OR IF YOUR WINDROW MERGER IS REPAINTED, REPLACE THE DECALS. REMEMBER: DECALS ARE FOR YOUR PROTECTION AND SAFETY.**
