ACT NOW

H&S Manufacturing is excited to offer you three incredible financing options to suit your needs.

2.99% - Ideal for those who want to pay off their purchase quickly while enjoying the benefits of low interest.

The **3.99%** plan gives you a low rate and comfortable payment period.

Or take advantage of our **4.99%** rate. Still competitively low but providing you with the flexibility you need.

Each option is designed to make your H&S equipment purchase smooth and affordable.

Whether you are looking for a *Manure Spreader, Action Rake, Hi-Capacity Rake, Linewrap, Hi-Dump Cart, Forage Box or Merger* we have what you need, and most equipment is on the lot and ready for delivery.

Contact H&S or speak with your local H&S dealer today before the opportunity passes you by.

3100/3200 series heavy-duty spreaders

Five models to choose from!

H&S heavy-duty manure spreaders are available in **235, 270, 310, 370, and 430 bushel** models!

The spreaders feature standard two-speed apron drive and fiberglass-reinforced plywood sides for minimal freezing. The plastic-coated plywood floor allows for considerably less torque to move a heavy load.

Massive Unitized Welded Frame

Compare the H&S frame with any on the market for strength.

Optional Top Beater

The optional top beater provides load leveling and spreading of high heaped loads (standard on the SW3243!)

Easy Clean-up

The sides, front panel, and both sides of the rear hydraulic endgate use fiberglass reinforced plywood to provide for easy cleaning and minimal freeze-up.

"We bought our 310 manure spreader back in 2000 and have used it almost weekly in the winter months. The durability of their equipment has made a lasting impression on our farm. We are very pleased with the H&S brand."

IDEN FARMS - NEWARK, OH

4200 series **HYDRA-PUSH** spreaders

Four horizontal and vertical beater models!

H&S patented reverse flighting offers a superior spread pattern on the 4200 series *HYDRA-PUSH* manure spreaders.

Four **425 and 550 bushel** horizontal and vertical beater models are available! A rear **monobloc gearbox** is standard on vertical beater models.

Maximum Floor Support

The structural channel floor supports are spaced 9 ½" apart for maximum floor support.

Patented Reverse Flighting

Reverse flighting at the top of the vertical beaters creates a far more even spread pattern. The beater assembly is removable on all 4200 series models.

No Freeze-up

All *HYDRA-PUSH* models use solid virgin grade poly with UV inhibitor for the floor and sides, reducing friction with no freeze-up.

"They're easy to use, there's not a lot of moving parts, and it's low-maintenance. Winters in Wisconsin get cold, and they don't

freeze up."

VICTOR G. - CHIPPEWA FALLS, WI

5200 series **TOP SHOT** spreaders

Five side-discharge models available!

The 5200 series **TOP SHOT** side-discharge manure spreaders are available in five models offering a 1,286-4,200-gallon capacity.

The **TOP SHOT** features a 40" wide side discharge expeller beater and adjustable expeller shield. Truck mounts are optional on the TS5234 and TS5242.

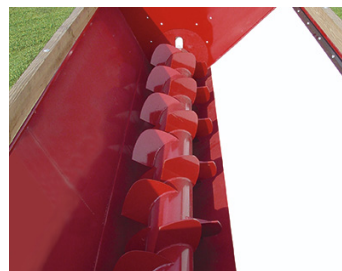

Left Side Poly Lined Tank

The heavy-duty expeller system cuts the drift of material towards the tractor and spreader and provides an excellent spread pattern.

Set Discharge Distance

A manual adjust top shield allows you to set the distance of material being discharged.

Auger System

The auger system hydraulically raises and lowers a full 8" to break-up material that may bridge during unloading.

"It spreads two loads of manure every day. It has been our best spreader we have ever had."

CARTER A. - SMOCK, PA

2200/3200 series **ACTION** rakes

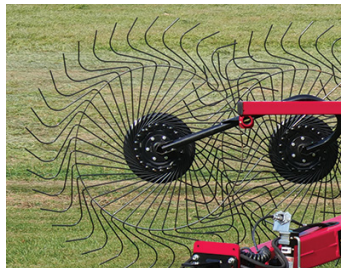

Easy rake wheel down pressure adjustment!

The 2200 Series **ACTION** rakes are available in 8 & 10, and 12-wheel models, and the 3200 series are available in 10 and 12-wheel models. **ACTION** rakes have greater clearance in the raking position and more stability during transport than the competition.

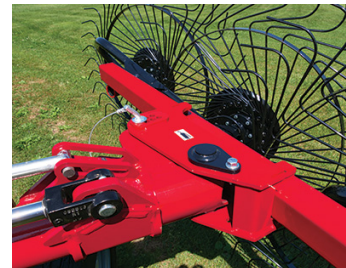

Releases Crop Uniformly

When raised, the rake releases crop uniformly for a finished windrow.

60" Rake Wheels

Increase raking efficiency with more teeth. The 3200 series features independent rake wheel suspension.

Set Windrow Width

There are multiple width adjustments on the wheel rake beam for setting the windrow width. Just place the pin in the hole that optimizes windrow size!

"My farm has been using H&S rakes for about ten years. Ever since we switched to H&S, we have had hardly any breakdowns. They are durable and made out of strong material."

MADDOX C.

LW1100 **LINEWRAP** bale wrapper

Maximize your baleage yield!

Maximize baleage yield with less time and effort with the LW1100 **LINEWRAP** bale wrapper! The **LINEWRAP** can wrap round or square bales, and the automatic operating mode allows for a **1-person operation!**

Releases Crop Uniformly

When raised, the rake releases crop uniformly for a finished windrow.

Independent Power Source

The Linewrap's independent power source is a Honda iGX390 gas engine with electric start.

Shut-off Valve Locks Brakes

A shut-off valve locks the brakes hydraulically against the tires. This prevents the wrapper from rolling ahead too easily when wrapping

so proper pressure is kept between bales.

"I started a bale wrapping business and bought my first H&S wrapper. Since then, I have purchased a second bale wrapper and wouldn't go with any other brands! Very easy to run!."

ERIC O. - FREEPORT, MN
